Index of Articles: 1989-1990

Two years of RF Design *Articles, Organized by Subject*

Cover Story

MOSFET Amplifiers Offer Wide Bandwioth and Low Cost, January 1989, p. 25.
Monolithic RF Amplifiers: More Options for Designers, February 1989, p. 35.
New Transistors for the Next Generation of Cellular Base Stations, Serge Juhel, John Walsh, William Imhauser, April 1989, p. 27. Errata, July 1989, p. 13.
Cellular Chip Set Speeds Design-to-Production Process, May 1989, p. 26.
New Range of RF and High-Speed Digital MMICs, N. Osbrink and Aventek Advanced Bipolar Products Staff, June 1989, p. 35.
1989 Contest Winners, Gary A. Breed, July 1989, p. 28.
Kansas City Hosts Quartz Industry, August 1989, p. 27.
Surface-Mount Products Match T0-8 Performance and Availability, Louis M. Seieroe, Kenneth S. Ledford, Timothy J. Blaney, Louis Hsaio, October 1989, p. 22.
SANA: Nodal Network Signal and Noise Analysis and Optimization, Richard C. Webb, November 1989, p. 29.
A Modular Approach to Communications Power Amplifiers, Tom Litty and Ki Nam, February 1990, p. 27.
Designing With High Frequency Prescalars, Donald R. Apte and Terry J. Cummings, March 1990, p. 47. Errata, June 1990, p. 10.
A 1-Watt Amplifier for 20-1000 MHz, J. Gustafson and M. Roberts, May 1990, p. 32.
GaAs NCO Operates up to 1.4 GHz, Gwyn Edwards, June 1990, p. 42.
Results of the 1990 RF Design Awards Contest, Gary A. Breed, July 1990, p. 47.
New Test Cell Offers Both Susceptibility and Radiated Emissions Capabilities, John Osburn, August 1990, p. 39.
Piezoelectric Devices Conference, September 1990, p. 48.
New Network Analyzer for Precision Baseband and RF Measurements, Alan Fryer, October 1990, p. 45.
A New 100 Hz to 26.5 GHz Spectrum Analyzer, December 1990, p. 52.

Industry Insight

Test Equipment Consumers to Benefit in '89, Mark Gomez, January 1989, p. 22.
The Gallium Arsenide Trend, Mark Gomez, February 1989, p. 24.
RF Power Transistors — A Status Report, Mark Gomez, March 1989, p. 21.
RF Packaging — To BeO or Not to BeO, Katie McCormick, April 1989, p. 21.
Current Activity in Frequency Synthesis, Mark Gomez, May 1989, p. 21.
Is RF Shifting to Subsystems?, Mark Gomez, June 1989, p. 29.
Manufactured Filters See Growing Use, Mark Gomez, July 1989, p. 21.
RF Attenuators and Switches: An Update, Mark Gomez, August 1989, p. 19.
A Market Overview of Inductors and Magnetic Materials. M. Gomez, September 1989, p. 19.
The Outlook for SAW Technology, Mark Gomez, October 1989, p. 21.
PCs Spell Growth for RF Software, Katie McCormick, November 1989, p. 27.
A Look at RF Cables and Connectors, Mark Gomez, December 1989, p. 22.
Crystal Oscillators: A Market and Technology Update, Mark Gomez, January 1990, p. 24.
Low Cost Instruments in RF, Mark Gomez, February, 1990, p. 24.
Budget Priced Software Growth Follows PC Boom, Mark Gomez, March 1990, p. 32.
The Changing Face of Consumer Electronics, L. Pomfret and M. Gomez, April 1990, p. 24.
The Low Noise Transistor Market, Gary A. Breed, May 1990, p. 31.
MMIC Makers See Growth in Communications, RF Design Editorial Staff, June 1990, p. 23.
Changes in the Power Amplifier Market, Charles Howshar and Liane Pomfret, July 1990, p. 25.
Evolution of the RF Capacitor Market, Charles Howshar and Liane Pomfret, August 1990, p. 26.
A Bright Future for RF ICs, Liane Pomfret and Charles Howshar, September 1990, p. 32.
EMI Control - Essential for Design, C. Howshar and L. Pomfret, October 1990, p. 26.
Military Subsystems: A Waiting Game, Liane Pomfret and Charles Howshar, November 1990, p. 29.
VXIbus: A Standard for the Modular Instruments Market, Charles Howshar and Liane Pomfret, p. 24.

EMC Corner

EMI Signal Measurement Automation, Roger Southwick, January 1989, p. 53. Errata, June 1989, p. 13.
A Low-Cost, High-Performance Noise Blanker, Oliver L. Richards, February 1989, p. 80. Errata, April 1989, p. 13.
EMC News Report, March 1989, p. 46.
A Fundamental Review of EMI Regulations, Daryl Gerke, April 1989, p. 57.
EMI Reduction Techniques for Analog and Digital Circuits, Michael J. Chernus, May 1989, p. 49.
Designing Facilities for Lightning Protection, Richard Little, June 1989, p. 62. Errata, August 1989, p. 13.
FCC Revises Part 15, Gary A. Breed, July 1989, p. 51.
The Navy's Program for Excellence in EMC, James Whalen and Richard Ford, August 1989, p. 60. Errata, September 1989, p. 12.
Interference Susceptibility Testing With White Noise, Bent Hessen-Schmidt, September 1989, p. 41.
Fiber Optic Current Sensing for EMC Testing, Jon Tobelmann, October 1989, p. 48.
Computers as Victims of RF Interference, Daryl Gerke, November 1989, p. 55.
A New Broadband Antenna, Roger Southwick, December 1989, p. 47.
Modelling Interconnects in Spice, Charles Hymowitz, January 1990, p. 49.
A FORTRAN Update of the MININEC Electromagnetics Modeling Program, Alan Carr, February 1990, p. 59.
Shielding Basics, Thomas A. Jerse, March 1990, p. 83.
A Human Plate Antenna, David Sullivan, April 1990, p. 52. Errata, June 1990, p. 10.
A Review of Common RFI Sources, Gary A. Breed, May 1990, p. 64.
Uncertainty in Spectrum Analyzer Based Measurements, Dave Massie, June 1990, p. 60.
EMC News Update, July 1990, p. 61.
Superimposing Low-Phase-Noise, Low-Drift Instrumentation Techniques on RF Design, C.M. Felton, October 1990, p. 65.
Application of Shielded Cables, Thomas Jerse, November 1990, p. 79.
Spread Spectrum ASIC for Part 15 Devices, Ray Simpson, December 1990, p. 56.

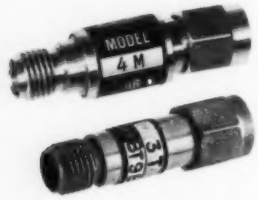
Amplifier Design

Operation of Linear Class AB Amplifiers, Hakan Turkoz, January 1989, p. 41.
Low-Noise VHF and L-Band GaAs FET Amplifiers, Al Ward, February 1989, p. 38.
A New Negative Feedback Amplifier, Victor Koren, February 1989, p. 54.
CAD Optimizes the Gain of Dual Gate MOSFET VHF Amplifiers, Amy Purushotham, S.V.K. Shastry, February 1989, p. 61. Errata, May 1989, p. 13.
A Bi-Directional Amplifier for SSB Tranceivers, Mark W. Thompson, June 1990, p. 71.

Oscillator Design

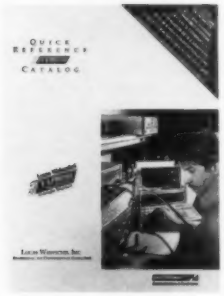
A Test Oscillator for Overtone Crystals, Clint Bowman, January 1989, p. 58.
Digital Temperature Compensation for Oscillators, Steven Fry, February 1989, p. 116.
A General-Purpose Oscillator, Jonathon Y.C. Cheah, June 1989, P. 56. Errata, August 1989, p. 13.
An Analysis of Inverter Crystal Oscillators, Leonard L. Kleinberg, August 1989, p. 28. Errata, October 1989, p.12.
A Quartz Watch Time Base Monitor, George P. Vella-Coleiro, August 1989, p. 35. Errata, September 1989, p. 12.
Quartz Resonator Model Measurement and Sensivity Study, Donald C. Malocha, Huat

RF Components from Stock!



Lucas Weinschel now offers the fastest way for you to acquire RF Components for your applications or production use. Select from our wide variety of standard products that can be shipped to you within 24 hours of placing your order (guaranteed or we pay the shipping).

ANNOUNCING!!!
Lucas Weinschel
EXPRESS
(800) 542-4457
Overnight Shipment



For more information or a copy of our Quick-Reference *Express* Catalog of all components offered by the *Express*, contact the Sales Department at Lucas Weinschel by calling (301) 948-3434 or (800) 542-4457, or by FAX (301) 948-3625.

Lucas Weinschel

ENGINEERING THE COMPONENTS OF EXCELLENCE

INFO/CARD 68

Ng, Michael Fletcher, August 1989, p. 38.
A Balanced RF Oscillator, Branislav Petrovic, December 1989, p. 35.
Nonlinear CAE Software Optimizes Oscillator Design, Octavius Pitzalis and Tom Reeder, April 1990, p. 29.
VHF and UHF Crystal Oscillators, Andrzej B. Przedpelski, July 1990, p. 63.
Negative-Gain Single Pole Oscillators, Leonard Kleinberg, September 1990, p. 35.
Constant Reactance Voltage Controlled Oscillator, Raymond Page, October 1990, p. 76.

Filter Design

An Active Tunable Group Delay Equalizer, Vishwajit Mitra, Ing, W. Rupprecht, March 1989, p. 27.
Monolithic Ceramic Block Combline Bandpass Filters, D. Agahi, March 1989, p. 35.
A Design Program for Butterworth Lowpass Filters, David C. Greene, March 1989, p. 43.
A Parallel-Coupled Resonator Filter Program, Andrew W. Westwood, March 1989, p. 56.
Bridged-Tee Delay Equalizers - A Computer Aided Realization, Robert C. Kane, April 1989, p. 63.
Lowpass Connector Filters: An Overview, Andrew Dawson, July 1989, p. 41.
Specifying SAW Bandpass Filters, Lisa Schwartz, August 1989, p. 53.
Chebyshev Filters With Arbitrary Source and Load Resistances, Jack Porter, August 1989, p. 63.
Errata, October 1989, p. 12, December 1989, p. 12
An Unconventional Varactor-Tuned Bandpass Filter, G. Thomas, November 1989, p. 35.
Absorptive Directional Filters, Michael Fithian, November 1989, p. 41.
Chebyshev Lowpass Filter Design, David C. Greene, 1990 RF Design Directory, p. 70.
Elliptic Lowpass Filter Design, David C. Greene, 1990 RF Design Directory, p. 73.
An RF Active Elliptic Filter, Eric Kushnick, February 1990, p. 35.
Accurately Predict Finite Q Effects in Bandpass Filters, J. Crawford, March 1990, p. 119.
Focus on Ferrite Filters, William D. Kimmel, August 1990, p. 32.
Crystal Delay Equalizers, W. Lurie, December 1990, p. 64.

Transmission Lines/Couplers

Minimum Attenuation Geometry for Coaxial Transmission Line, Ernie Franke, May 1989, p. 58.
Interstage Coupling With an Edge-Coupled Line, H. Paul Shuch, June 1989, p. 52.
Lumped-Element Quadrature Couplers, Andre Boulouard, July 1989, p. 56.
Crystal Delay Equalizers, William B. Lurie, August 1989, p. 56. Errata, October 1989, p. 12.
A High Power Directional Coupler, Alan R. Carr, September 1989, p. 35.
Design of Wideband Quadrature Couplers for UHF/VHF: Part I, Chen Y. Ho, Ge-Lih Chen, November 1989, p. 58.
Design of Wideband Quadrature Couplers for UHF/VHF: Part II, Chen Y. Ho and Ge-Lih Chen, December 1989, p. 51.
Design of Transmission Line Matching Circuits, Stanislaw Rosloniec, February 1990, p. 52.
Realizing the Theoretical Harmonic Attenuation of Transmitter Output Matching and Filter Circuits, David Festing, February 1990, p. 49.
Twisted-Wire Transmission Lines, John H. Broxon and Douglas K. Linkhart, June 1990, p. 73.
Split-Tee Power Divider, Stanislaw Rosloniec and Piotr Lochowicz, September 1990, p. 65.

Transmitters/Receivers

A Microwave Oven to Amateur TV Transmitter Conversion, David Pacholok, March 1989, p. 48.
A Simple 49 MHz Transmitter, Gary Carroll, September 1989, p. 38.
Design, Analysis, and Test of a Wideband HF Receiving Subsystem, John Link and Harry Lenzing, March 1990, p. 55.
Combining Gain, Noise Figure, and Intercept Point for Cascaded Circuit Elements, Ricky E. Hawkins, March 1990, p. 77.

Frequency Synthesis

PLL Implementation, Andrzej B. Przedpelski, February 1989, p. 109.
Modeling PLL Tracking of Noisy Signals, G. Stephen Hatcher, February 1989, p. 113.
A BASIC Program for PLL Design, James B. Conn, June 1989, p. 74.
A Reference-Cancelling Phase/Frequency Detector, Dan Baker, July 1989, p. 35.
Modeling Discrete-Time Phase Detection in the PLL, C.W. Price, May 1990, p. 57.
Hybrid PLL/DDS Frequency Synthesizers, Rob Gilmore and Richard Kornfeld, July 1990, p. 41.
A Feedback Method for Reference Spur Reduction in PLLs, John W. MacConnell and Dr. Richard W. Booth, September 1990, p. 50.
Coherent Synthesizer Drives MOTR, PTS Staff, September 1990, p. 71.

Test and Measurement

Characterizing Resonators With S-Parameter Network Analyzers, Tim Semones, January 1989, p. 47.
Easy Phase Noise Measurement, Raymond Dewey, April 1989, p. 54. Errata, June 1989, p. 13.
Increased Dynamic Range Measurements Using a Network Analyzer, Chris Day, May 1989, p. 44.
Principles of Digital Storage Oscilloscope Operation, Gene Andrews, May 1989, p. 52.
VXIbus: Benefits for RF Applications, Malcolm Levy, September 1989, p. 32.
Instrumentation Options and Cost Considerations for Compliance Testing, Roger Southwick, August 1990, p. 29.
A Portable Low Cost RF Voltmeter, Dale Lindseth, October 1990, p. 29.
Log Fidelity Test Fixture, James English, November 1990, p. 85.

Mixers, Multipliers and Dividers

A Mixer Spurious Plotting Program, Richard Bain, May 1989, p. 32. Errata, July 1989, p. 13.

Frequency Division With Varactor Diodes, William J. Hoffert, October 1989, p. 35.

A Spurious Response Program for Wideband Mixer Circuits, William E. Sabin, October 1989, p. 41.

A 1.8 GHz Odd-Ratio Frequency Divider, David Korn and Carl Deierling, May 1990, p. 41.

A Harmonic Suppressing Digital Frequency Divider, Mitch Randall, August 1990, p. 55.

Experiments with Primitive FET Mixers, Wes Hayward, November 1990, p. 39.

Modulation/Demodulation

Carrier Detection Utilizing FM Click Characterization, Gerald L. Somer, June 1989, p. 80.

Digital Amplitude Modulation, Timothy Hulick, December 1989, p. 39.

Complex Signals: Part I, Noel Boutin, December 1989, p. 27.

Complex Signals: Part II, Noel Boutin, January 1990, p. 57.

A Low Cost RF Modem, Jon GrosJean, January 1990, p. 35.

RF Modems Simplified, John Hatchett and Dennis Campbell, January 1990, p. 27.

The LINC Transmitter, Fernando Casadevall, February 1990, p. 41.

Complex Signals: Part III, Noel Boutin, March 1990, p. 109.

Detector for Small Amplitude RF Signals, Bruno Fognini, March 1990, p. 35.

Performance of Envelope Detectors in Direct Sequence Spread Spectrum Systems, Glen A. Myers, March 1990, p. 68.

Linear Diode Low Level Envelope Detector, Pete Lefferson, April 1990, p. 35.

Complex Signals: Part IV, Noel Boutin, May 1990, p. 65.

Circuits for Wideband FM Demodulation, Alvin Wong and Ali Fotowat, December 1990, p. 27.

Antennas and Propagation

Factory Radio Communications, Theodore S. Rappaport, January 1989, p. 67.

RF Propagation in Buildings, T. Koryu Ishii, July 1989, p. 45. Errata, October 1989, p. 12.

Active DF Antennas, Henry W. Anderson and R. Stephen Smith, November 1989, p. 62. Circuit Analysis

Design of Constant Phase Difference Networks, Thomas A. Keely, April 1989, p. 32.

BASIC Program for 90-Degree Allpass Networks, Allan G. Lloyd, April 1989, p. 47.

S-Parameters in Spice, Thomas B. Mills, June 1989, p. 45.

Software-Assisted Characterization of Large-Signal Device Models, Jeremy M. Bunting, September 1989, p. 27.

Calculating S-Parameters From Nodal Analysis, Bert K. Erickson, September 1989, p. 44.

A Nodal Network Analysis Program, November 1989, p. 82.

Principles of Transistor Interactive Mapping, Charles R. Ruelke, 1990 RF Design Directory, p. 81.

A Smith Chart Program for the Macintosh, Jim Long, March 1990, p. 116.

Curve Fitting Made Easy, Brian Miller, June 1990, p. 27.

MMIC Foundry Models Using Standard CAD Simulators, Raymond S. Pengelly and Ulrich L. Rohde, June 1990, p. 33.

Phase Difference Networks, W.G. Beauregard, 1990/91 Directory, p. 89. Errata, December 1990, p. 10.

E. Stockman, 1990/91 Directory, p. 94.

Microstrip CAD Program, T. Cefalo, Jr., October 1990, p. 37. Errata, December 1990, p. 10.

A Review of the Program BAND, David Greene, November 1990, p. 98.

High Speed Analog and Digital Circuits

Avoiding Grounding Problems in High Speed Circuits, Jeff Barrow, July 1989, p. 32.

Noise Power Ratio Characterizes A/D Performance for Communications, Michael Johnson, October 1989, p. 44.

High Frequency Op Amp Makes Precise Detector and AGC, Brian Mathews and David Riemer, November 1989, p. 76.

Digital Communications Using Direct Digital Synthesis, Earl McCune Jr., January 1990, p. 39.

Loading Conditions for High Speed Logic Systems, Alfred Dantas, September 1990, p. 42.

Measurement of Analog-to-Digital Converter Settling Time with Equivalent Time Sampling, Thomas Hack, November 1990, p. 67.

Dynamic Evaluation of High-Speed, High Resolution D/A Converters, James Colotti, November 1990, p. 51.

Using Current Feedback Amplifiers, Al Little, December 1990, p. 47.

Phase Shifters/Matching Networks

CAD for Lumped Element Matching Circuits, Stanley Novak, February 1989, p. 102.

Design of Line Matching Networks, Peter Martin, February 1989, p. 99. Errata, May 1989, p. 13.

Phase Relationships for Maximum Power Transfer, Robert A. Witte, June 1989, p. 70.

A Wideband 70 MHz Phase Shifter, Francois Methot, May 1990, p. 39.

High-Speed Microprocessor-Controlled Antenna Matching Unit, Hakan Turkoz and Yilmaz Oktay, April 1990, p. 32.

Optimum Lossy Broadband Matching Networks for Resonant Antennas, F.J. Witt, April 1990, p. 44. Errata, July 1990, p. 10

Broadband Impedance Matching by Polynomial Synthesis, David Lang, November 1990, p. 102.

Miscellaneous Articles

RF Components at Low Temperatures, Otward Mueller, January 1989, p. 29.

A Simple Low-Cost RF Switch, Tad Harris, July 1989, p. 53.

Modular RF Systems Shorten Design-to-Product Time, Alan Victor, October 1989, p. 31.

Perspectives on Ceramic Chip Capacitors. Part I: Device Properties, Mark W. Ingalls, November 1989, p. 49.

The RF Technology Expo 89 Technical Program, January 1989, p. 59.

RF Expo East Technical Program Offers Variety and Depth, October 1989, p. 50.

New Products Featured at RF Technology Expo 89, February 1989, p. 90.

New Products Featured at RF Expo East, November 1989, p. 70.

RF Technology Expo 90 Technical Program, March 1990, p. 89.

Featured Products at RF Technology Expo 90, March 1990, p. 96.

Comments of MIL-STD-2000, Robert Mouck and Stanley Kaat, September 1990, p. 40.

A Lowband RF Quiet Switch, Kevin Randall, July 1990, p. 29.

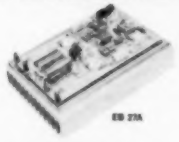
A Truly Inexpensive VHF/UHF RF Switch, Andrew Singer, September 1990, p. 76.

RF Expo East Features and Outstanding Technical Program, October 1990, p. 79.

Oxide-Isolated Integrated Circuits for High Frequency Applications, David W. Hughes, 1990/91 Directory, p. 97.

Noise Bandwidth Calculations, Richard Bain, 1990/91 Directory, p. 87. Errata, December 1990, p. 10.

HF LINEAR AMPLIFIERS - BROADBAND TRANSFORMERS



HF AMPLIFIERS per MOTOROLA BULLETINS

Complete Parts List for HF Amplifiers Described in the MOTOROLA Bulletins

AN758 300W $160.70
AN762 140W $ 93.25
AN779L 20W $ 83.70
AN779M 20W $ 93.10
AN313 300W $463.00
EB61 140W $ 88.05
EB37A 300W $139.30
EB104 600W $448.15
AR385 300W $383.52

NEW! 1K WATT 2-30 MHz Amplifier

POWER SPLITTERS and COMBINERS
2—30MHz
600 Watt PEP 2—Port ..... $ 66.95
1000 Watt PEP 3—Port ..... $ 75.95
1250 Watt PEP 4—Port ..... $ 89.95

100 WATT 420-450 MHz PUSH-PULL LINEAR AMPLIFIER — SSB-FM-ATV

KEB67—PK (Kit) $159.90
KEB67—PCB (PC Board) ..... $ 15.00
KEB67—I (Manual) ..... $ 5.00

We also stock Hard-to-Find parts

CHIP CAPS—Kemet/ATC
METALCLAD MICA CAPS—Unelco/Semco
RF POWER TRANSISTORS
MINI-CIRCUIT MIXERS
SBL—1 (1—500Mhz) ..... $ 9.50
SBL—1X (10—1000Mhz) ..... $ 7.95

ARCO TRIMMER CAPACITORS

VK200—29/6B RF Chokes ..... $ 1.20
5K—500—61—3B Ferrite Bead ..... $ .20
Broadband HF Transformers

Add $ 3.50 for shipping and handling.

2 METER VHF AMPLIFIERS
35 Watt Model 335A ..... $ 79.95 Kit
75 Watt Model 875A ..... $139.95 Kit
Available in kit or wired/tested

For detailed information and prices, call or write for our free catalog.

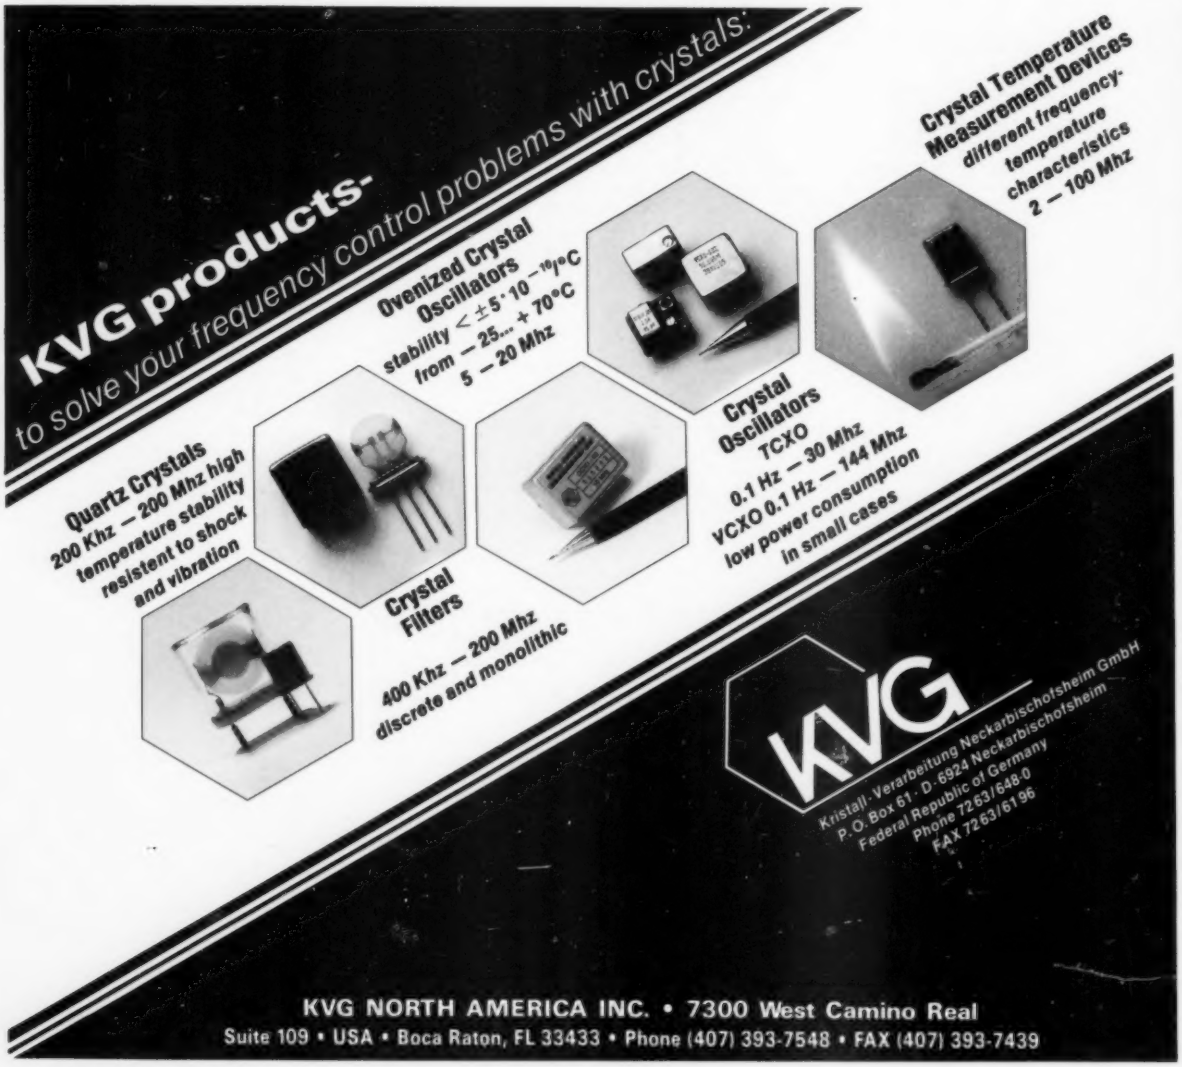
Analog and Digital Signal Processing and Coding, P.M. Grant, C.F.N. Cowan, B. Mulgrew and J.H. Dripps, Chartwell-Bratt Limited; March 1990, p. 45.

Radar Systems, Paul A. Lynn, Van Nostrand Reinhold; March 1990, p. 45.

Phase Noise Analysis in Radar Systems Using Personal Computers, Stanley J. Goldman, John Wiley and Sons; March 1990, p. 45.

Designing with Field Effect Transistors, Second Edition, Revised by Ed Oxner, McGraw-Hill; March 1990, p. 45.



KVG products-
to solve your frequency control problems with crystals:
Ovenized Crystal Oscillators
stability < ±5 · 10⁻¹⁰/°C
from — 25... + 70°C
5 — 20 Mhz
Crystal Temperature Measurement Devices
different frequency-temperature characteristics
2 — 100 Mhz
Quartz Crystals
200 Khz — 200 Mhz high temperature stability
resistent to shock and vibration
Crystal Filters
400 Khz — 200 Mhz
discrete and monolithic
Crystal Oscillators
TCXO
0.1 Hz — 30 Mhz
VCXO 0.1 Hz — 144 Mhz
low power consumption
in small cases
